

## II. INVENTORY OF CENTRAL OHIO RAIL LINES

The following sections provide a brief description of each of the rail lines. Additionally, each of the sections discusses noteworthy features of the corridor, as well as the availability of the railroad, based on available right-of-way, for possible alternative transportation modes.

Additionally, the maps for each rail line display the location and type of railroad crossings as well as the actual railroad alignment. A second map for each rail line displays the land use around each line.

The lines described are as follows (please refer to the map on Figure 16 to match line locations):
