

The Center for Energy and Environment at MORPC conducts Carbon Footprint Assessments for MORPC's member communities. Assessments take into account government energy usage in buildings, street and traffic lights, fuel used in vehicles, waste landfilled, public facilities, and tree canopy on public lands. The following is a list of the communities that have taken advantage of this opportunity:

Carbon Footprint Assessment Communities:	
Dublin	New Albany
Franklin County	Upper Arlington
Gahanna	Westerville
Hilliard	Whitehall
MORPC	Worthington

The chart below is an example of the information available to a community through carbon footprint assessment.
