Proposed Resolution T-9-08 will modify eight projects and delete five projects that are included in the TIP. These changes are necessary to ensure that these projects can advance utilizing the identified sources of funding.

The following describes the resolution attachments and the applicability of MORPC's Routine Accommodation Policy for bicycle and pedestrian facilities.

The resolution has two attachments.

- **Attachment 1** shows modified project listings that would amend the Detailed Project Listings in the TIP.
- **Attachment 2** shows modified project listings that would amend the Transit TIP Table included in Appendix A of the TIP.

Below is an explanation of the proposed changes:

**COTA** is requesting the modification of seven projects and deletion of three projects in the TIP. Attachment 1 includes transit projects that have constrained federal or state funding, or are regionally significant. The changes would allow COTA to use Transit Formula Block Grants (Section 5307) to purchase new buses, MORPC-attributable funds for ITS Security and Control Center Integration, along with local revenue. Other TIP changes are due to funding availability and schedule changes.

In addition to the projects above, COTA is requesting changes to projects that only affect local transit funding sources and/or unconstrained funding. Attachment 2 comprises these projects. Attachment 2 includes three projects that are being deleted.
