

Pataskala Corporate Park Rail Spur

Submitted by: City of Pataskala

Project ID per ODOT: ODOT PID: N/A	Total Project Cost: \$5,000,000
	Funding Requested from TRAC: Current Request: \$4,950,000 <i>New to Tier II</i>

Project Description

Construct rail spur and turn out from main line into Corporate Park and Jobs Ready Site that is currently under development. This will involve grading and compaction of soils, construction of track bed and tracks, and crossings at Mill Street and at Etna Parkway. Pataskala is asking for funding to complete the Preliminary Engineering, Detailed Design, and Construction phases of the project. However, this project has not completed NEPA, and therefore TRAC most likely will not provide funding for Detailed Design or Construction during this round. In this scenario, TRAC might fund \$250,000 for Preliminary Engineering.

Potential Impacts

The purpose of the project is to provide fully multi-modal transportation options to prospective industries that will be located in the Corporate Park, and more specifically to the Jobs Ready Site (JRS), to complement a new road through the Corporate Park funded in part by the JRS Grant Program.

Is this project on MORPC's 2030 Transportation Plan? YES NO

Bicycle, pedestrian and/or transit facilities? YES NO

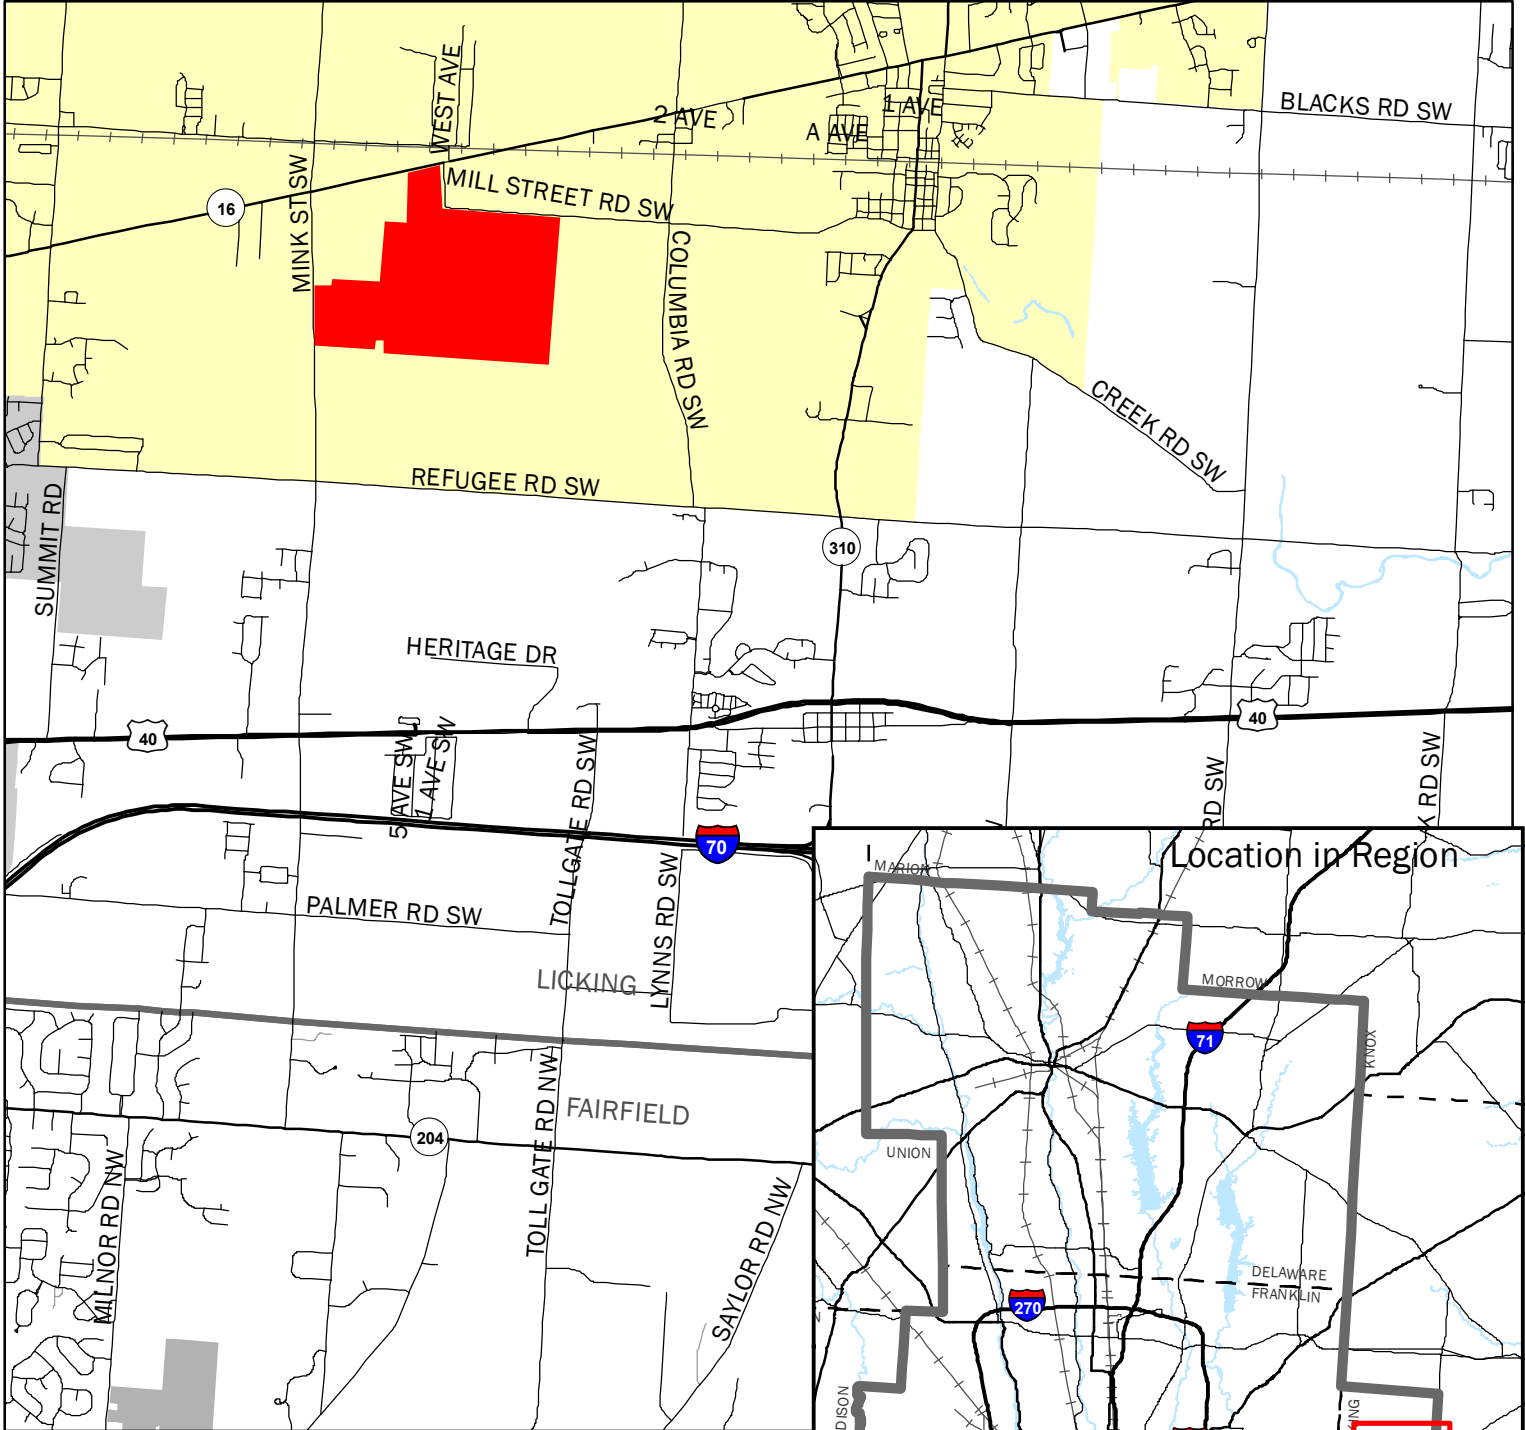

(It should be noted that the Transportation Plan does not routinely include freight rail projects which are usually private)

Progress toward Construction

Planning Study	March 2011
Interchange Justification Study	N/A
NEPA:	September 2011
Detailed Design	January 2012
Right of Way:	December 2012
