# Air Quality Summary | September 2019

MID-OHIO REGIONAL  
**MORPC**  
PLANNING COMMISSION

## Central Ohio

The Mid-Ohio Regional Planning Commission provides daily air quality forecasts and issues Air Quality Alerts to help you plan ahead and protect your health. For free Air Quality Alerts and more information please visit:

[www.morpc.org/airquality](http://www.morpc.org/airquality)

Air quality conditions in September 2019 were similar to those observed in September 2017 and worse than those observed in September 2018. Over half an inch of the monthly total rainfall of 0.85 inches fell on September 1, 2019. The remainder of the month was relatively warm and dry, which aided ozone formation. The warmest days coincided with the majority of the Moderate ozone days. There were 8 days in September when high temperatures reached 89°F or higher. Moderate ozone AQI levels were recorded on 7 of these 8 days.

### Daily Maximum AQI for September 2019

In September 2019, AQI levels in the Columbus region were Good on 21 days and Moderate on 9 days. No Air Quality Alerts were issued, and no Unhealthy for Sensitive Groups AQI levels were observed.

### Average Temperature

The average temperature in Columbus in September 2019 was 72.8°F, which is 6.0°F above normal.

### Daily Maximum AQI for September by Category

### Average Precipitation

Columbus received 0.85 inches of precipitation in September 2019, which is 1.99 inches below normal.
