

Minor expansion projects change the flow of traffic on roadways in certain localized areas without adding significant capacity to the system. Minor expansions comprise these types of projects:

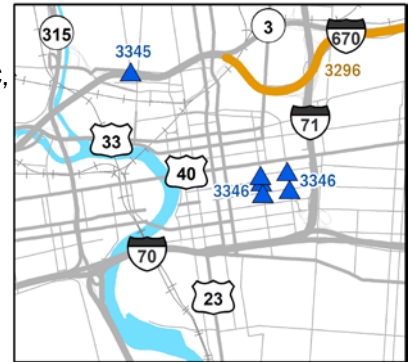

- **Minor widenings** add turn lanes or a center-left turn lane to a segment of roadway – including any bridges.
- **Intersection modifications** add turn lanes, install or modify traffic signals, or construct a roundabout.
- **Signal systems** add or modify communication systems between traffic signals, resulting in changes to the flow of traffic on roadways.

Minor Expansion Funding SFYs 2018-2021

Total: \$238 M
