Air quality conditions during the month of March have improved over the past several years, and March 2017 and 2018 are the cleanest on record (according to AirNow data). In March 2018, moderate northerly to northwesterly winds were observed in Columbus on the majority of days due to an active storm track pattern over the eastern U.S. These winds brought cold, clean air into the Columbus region, dispersing pollutants and limiting ground-level ozone formation.

Daily Maximum AQI For March 2018

In March 2018, AQI levels in the Columbus region were Good on all 31 days. No Unhealthy for Sensitive Groups (USG) AQI days were recorded in March 2018, and no Air Quality Alerts were issued for the month.

Average Temperature

The average temperature in Columbus in March 2018 was 38.5°F, which is 3.4°F below normal.

Daily Maximum AQI for March by Category

Average

Columbus received 2.96 inches of precipitation in March 2018, which is 0.06 inches below normal, and 3.2 inches of snow, ice pellets,
