Notes

1. The city high-crash location list includes intersections inside corporation boundaries that do not involve an Interstate or similar limited access highway.
2. Intersection totals include crashes within 250 ft. of the middle of the intersection, based on location information provided by the Ohio Dept. of Transportation.
3. PDO crashes are those resulting in property damage only (i.e., no injuries).
4. Equivalent Property Damage Only Index (EPDO) is calculated by the following formula:  $(39.24 \times [\# \text{ Fatal \& Ser Injury Crashes}] + 6.55 \times [\# \text{ Visible Injury Crashes}] + 4.44 \times [\# \text{ Possible Injury Crashes}] + [\# \text{ PDO Crashes}]) / [\# \text{ Total Crashes}]$ .
5. A location marked TOP 100 means it is also included on the list of Top 100 Regional High Crash Locations.
6. For more details on MORPC's crash methodologies, please visit: <http://www.morpc.org/program-service/transportation-safety/>.
7. The information provided is based on the best available sources, but is not guaranteed to be free from errors.

	5	Industrial Pkwy @ Taylor Rd	2	0	0	0	1	1	2.72	2	0	0	-

Notes

1. The county high-crash location list is limited to intersections within MORPC's Transportation Planning Area (See attached map). This includes all of Franklin and Delaware counties, and portions of Fairfield, Licking, and Union counties.
2. PDO crashes are those resulting in property damage only (i.e., no injuries).
3. Equivalent Property Damage Only Index (EPDO) is calculated by the following formula:  $(39.24 \times [\# \text{ Fatal \& Ser Injury Crashes}] + 6.55 \times [\# \text{ Visible Injury Crashes}] + 4.44 \times [\# \text{ Possible Injury Crashes}] + [\# \text{ PDO Crashes}]) / [\# \text{ Total Crashes}]$ .
