# Air Quality Summary | September 2018

Mid-Ohio Regional  
Planning Commission

## Central Ohio

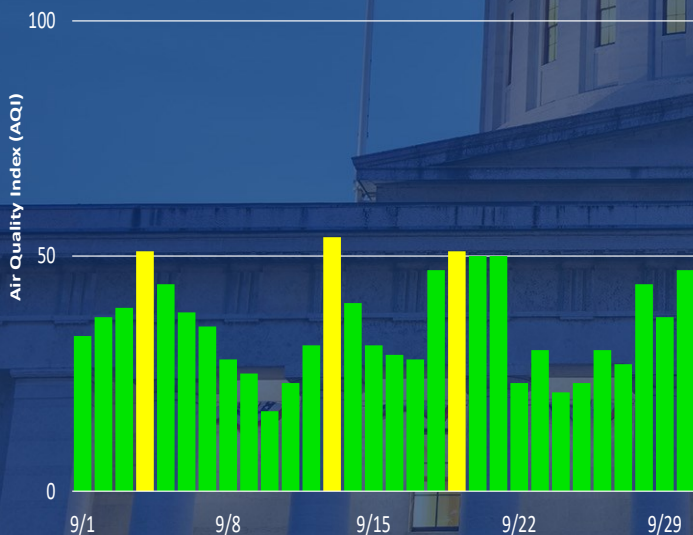

The Mid-Ohio Regional Planning Commission provides daily air quality forecasts and issues Air Quality Alerts to help you plan ahead and protect your health. For free Air Quality Alerts and more information please visit:

[www.morpc.org/airquality](http://www.morpc.org/airquality)

Air quality conditions in September 2018 were better than those observed in September 2017 and September 2016. Unlike these previous Septembers, no Unhealthy for Sensitive Groups days were observed. The remnants of Hurricane Florence moved over Ohio in the second half of the month, aiding atmospheric mixing and increasing cloud cover and precipitation. Concentrations of particulate matter and ozone pollutants were limited by this above-average rainfall and the large number of partly cloudy and cloudy days.

### Daily Maximum AQI for September 2018

In September 2018, AQI levels in the Columbus region were Good on 27 days and Moderate on 3 days. No Air Quality Alerts were issued in September.
