

ONE INTERNATIONAL GATEWAY

PROJECT
PROFILE

The One International Gateway project will replace the 1958 passenger terminal at John Glenn Columbus International Airport (CMH). The new terminal is one component of a midfield development program that includes parking structures, rental car facility, utility plant, shipping and receiving center, and space for hotels and restaurants. The terminal itself would be constructed when required by passenger demand.

Prioritized as a project of
**REGIONAL
SIGNIFICANCE**

Project Type:
Transportation - Aviation

Estimated Cost:
>\$2 billion

Lead Agency:
Columbus Regional Airport Authority (CRAA)

Project Contact:
Kristen Easterday, Director of Government Affairs
KEasterday@columbusairports.com | 614-239-5064

Partner Agencies:
Federal Aviation Administration (FAA)

Jobs Supported:
Critical amenity for economic development

Project Location

Center of the existing airport property, west of the current terminal near the air traffic control tower

Project Benefits

- Maintains competitive infrastructure by ensuring the airport terminal meets present-day standards in terms of checkpoints, holdrooms, curbside, baggage processing, and other key facilities
- Adds value to the transportation system by increasing passenger capacity to meet forecasted air travel needs and area population growth
- Provides a modern gateway to Columbus, the region, and the State of Ohio
- Upgrades an important business attraction and retention asset for economic development
- Supports tourism within the region
