Re: West Broad Street Bus Rapid Transit Corridor Neighborhood Access and Equity (NAE)
Capital Construction and Regional Partnerships Challenge Grants Application

Dear Secretary Buttigieg,

On behalf of The Ohio State University Wexner Medical Center, I am writing in support of the Central Ohio Transit Authority's (COTA) request for funding from Capital Construction and Regional Partnership Challenge Grants within the USDOT NAE Grant Program for the West Broad Street Bus Rapid Transit (BRT) corridor.

The Ohio State Wexner Medical Center is an academic medical center with seven hospitals, an expansive and growing network of outpatient care centers, a nationally ranked College of Medicine, more than 20 research institutes, a faculty group practice, an accountable care organization and a health plan that serves Columbus and the state of Ohio.

We are committed to creating healthier communities and addressing health care disparities by increasing access to high-quality, highly specialized care directly in communities. The West Broad Street BRT corridor is the first rapid transit corridor that will be constructed as part of the regional LinkUS partnership, and it, along with the other BRT corridors, will help connect patients to care. LinkUS is Central Ohio's comprehensive mobility initiative to help address growth, affordability and opportunity gaps in our community. Central Ohio is one of the fastest growing regions in the country and is on track to increase by 726,000 more residents over the next 25 years.

The average central Ohio household spends more than \$12,000 on transportation and the median home sale price is up 68% since 2020. More than 40,000 Franklin County households lack access to a personal vehicle and one-third of Franklin County residents live in areas of low opportunity. To address these challenges, LinkUS will build faster and more reliable public transportation; create safer and expanded bike and pedestrian paths; and enable truly walkable communities with more affordable access to work, meaningful workforce training opportunities, home and entertainment.

By 2050, LinkUS plans to construct: 5 rapid transit corridors and increase transit service hours by 45%; 500 new miles of sidewalks, bikeways, and trails; and \$250 million in complete streets roadway improvements.

Implementing LinkUS will advance numerous federal, state and local existing initiatives that are working to improve housing, poverty, safety and climate action in our community. Federal initiatives include the Columbus Workforce Hub and the National Information Technology

Innovation Center; state initiatives include creating a state climate action plan with funding from the U.S. EPA Climate Pollution Reduction Grant Program; and local initiatives include Equitable Transit Oriented Development, Vision Zero, and the Columbus Climate Action Plan. LinkUS will move our region forward together, starting with the West Broad BRT corridor.

The West Broad Street BRT Corridor includes 17 stations and will run approximately 9.3 miles along West Broad Street connecting Prairie Township, Franklin Township, Hilltop and Franklinton to Downtown Columbus. Where possible, it will have dedicated lanes for transit with premium stations in the center lane. It will also run on 15-minute or less intervals and have many of the same amenities as light rail, such as off-board fare collection as well as level and multidoor boarding.

This investment will greatly improve the opportunity gaps along the corridor, which stem from significant socio-economic disparities: approximately 76% of residents live within an area of persistent poverty; 36% of residents are Black, Indigenous or persons of color; 30% of residents live below the federal poverty level; and 16% of households lack access to a personal vehicle. The West Broad Street BRT will expand access, increase safety and enhance mobility for corridor residents as well as the thousands of people working within the corridor.

The West Broad BRT corridor is projected to support the addition of 40,000 more residents along the corridor and connect nearly 100,000 jobs along the corridor by 2040. The corridor will also provide the regional workforce with access to Columbus State Community College – a federally designated anchor institution for the Columbus Workforce Hub and the lead institution for the National Information Technology Innovation Center.

LinkUS will use the spaces surrounding the BRT stations to invest in trails, bikeways, accessible pedestrian paths and sidewalks, making it safer and more convenient for people to walk, bike and ride public transit. These spaces also offer an opportunity for equitable transit-oriented development to ensure that everyone in our communities benefit from this generational investment. Our community is also seeking a USDOT Pilot Program for Transit-Oriented Development (TOD) Planning Grant for the West Broad BRT to help us complete a capacity, economic and market analysis for transit stops on the corridor. In addition COTA was awarded a Regional Infrastructure Accelerator Grant from the Build America Bureau in 2022. The West Broad Street BRT Corridor is also in the CIG pipeline in project development.

These milestones were only possible due to the strong partnership and commitment of COTA, the City of Columbus, Mid-Ohio Regional Planning Commission and Franklin County. We believe that the transformational impact that the West Broad BRT will make in our community perfectly aligns with both the Capital Construction and Regional Partnership Challenge Grant components of the NAE Grant. Our organization wholeheartedly encourages USDOT to fund this application and thanks you for your consideration.

Sincerely,

John J. Warner, MD
