

STRATEGIES

AS RELATED TO THE PLAN GOALS

The strategies are the action items that will move the region forward in advancing the goals and achieving the objectives. These strategies are intended to be fulfilled by MORPC and other regional and local planning partners.

Because these strategies are generally applicable to the advancement of all six of the established goals, they are organized into three categories based on how they apply to the transportation system.

MANAGEMENT STRATEGIES

Identify action items to maintain and manage the existing transportation system efficiently. These system management strategies are further organized into:

- Physical Preservation
- Operations
- Safety
- Security
- Demand Management

DEVELOPMENT STRATEGIES

Apply to the expansion of the transportation system and address the various modal systems and infrastructure development.

- Bike & Pedestrian Infrastructure
- Transit Infrastructure
- Freight Rail Infrastructure
- Multimodal Infrastructure Connections
- Roadway Infrastructure

SYSTEM-RELATED STRATEGIES

Include action items that do not relate specifically to system management or development, but rather region-wide collaboration, decision making, and investment that can impact and/or be impacted by the region's transportation system.

- Development Decisions
- Alternative Fuels
- Equity
- Green Infrastructure

PERFORMANCE MEASURES

The MTP includes a variety of performance measures which gauge the progress the region is making towards the goals and objectives outlined in the plan. Performance measures relating to each of the strategies and project types included in the MTP are shown on the corresponding boards.
