

COLUMBUS CROSSROADS (INNERBELT)

PROJECT
PROFILE

The Columbus Crossroads/Innerbelt Corridor projects will complete a comprehensive reconstruction of the Interstate 70/71 Innerbelt through Downtown Columbus. The larger corridor also includes Interstate 71 between Frank Road/SR 104 and SR 315, including widening and interchange reconstruction. More than \$450 million has already been invested in initial phases that are complete or under construction.

Prioritized by:
FRANKLIN COUNTY

Project Type:
Transportation - Highways & Roads

Estimated Cost:
\$907.4 - \$1,095.2 million (breakdown on reverse)

Lead Agency:
Ohio Department of Transportation

Partner Agencies:
City of Columbus

Supporting Agencies:
Mid-Ohio Regional Planning Commission (MORPC),
Franklin County Engineer's Office

Jobs Supported:
More than 100,000 jobs in the downtown area

Project Location
Interstates 70 and 71 in Downtown Columbus

Project Benefits

- Maintains competitive infrastructure by relieving traffic congestion and adding capacity at the junction of two significant interstate routes
- Promotes active transportation by better connecting neighborhoods through bridge design enhancements, such as wider sidewalks, greenery, and lighting
- Increases safety by making improvements at three of the state's top 10 crash locations
- Adds value to the transportation system through construction of an additional lane in each direction, meaning two continuous lanes for both I-70 East and West and I-71 North and South
- Improves access to Downtown Columbus with redesigned ramp systems
