Air quality conditions in April 2019 were slightly better than those recorded in April 2018 and April 2017. The highest pollutant levels of the month were observed on April 6 and 18, when AQI levels reached 58. On April 6, temperatures only reached 70°F, but sunny skies and calm winds aided ozone formation and led to Moderate AQI levels. On April 18, temperatures near 80°F and sunny skies enhanced ozone production and resulted in another Moderate AQI day, despite moderate and gusty winds that aided dispersion.

Daily Maximum AQI for April 2019

In April 2019, AQI levels in the Columbus region were Good on 27 days and Moderate on 3 days. No Unhealthy for Sensitive Groups days were observed this month.
