Air quality conditions in February 2019 were better than those recorded in February 2018 and similar to February 2017. The highest pollutant levels of the month were observed on February 22. Surface high pressure over the Great Lakes generated light northeasterly winds, which transported pollutants from Cleveland into central Ohio. As a result, low-Moderate AQI levels were recorded in the Columbus area.

Daily Maximum AQI for February 2019

In February 2019, AQI levels in the Columbus region were Good on 25 days and Moderate on 3 days. No Unhealthy for Sensitive Groups days were observed this month.

Average Temperature

The average temperature in Columbus in February 2019 was 34.8°F, which is 2.0°F above normal.
