# Air Quality Summary | November 2018

Mid-Ohio Regional  
Planning Commission

## Central Ohio

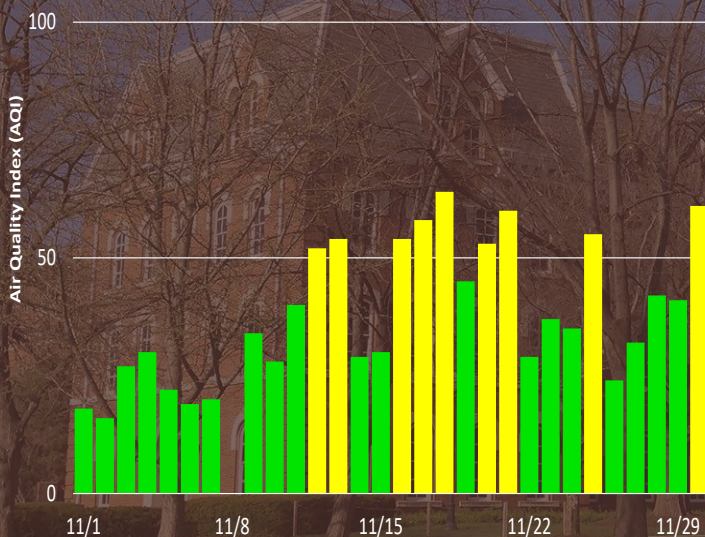

The Mid-Ohio Regional Planning Commission provides daily air quality forecasts and issues Air Quality Alerts to help you plan ahead and protect your health. For free Air Quality Alerts and more information please visit:

[www.morpc.org/airquality](http://www.morpc.org/airquality)

Air quality conditions in November 2018 were in the Moderate AQI category on a higher percentage of days than in November 2017 or November 2016. On many of the mornings in November, fog and mist aided in particle production in central Ohio. The cooler-than-average temperatures also yielded strong overnight temperature inversions, which trapped pollutants near the surface. Despite these conditions, frequent low-pressure systems kept the AQI levels in the Good category for 69% of days in November.

### Daily Maximum AQI for November 2018

In November 2018, AQI levels in the Columbus region were Good on 20 days and Moderate on 9 days. On November 7, there were insufficient data for an AQI calculation.

### Average Temperature

The average temperature in Columbus in November 2018 was 39.2°F, which is 5.2°F below normal.

### Average

Columbus received 5.70 inches of precipitation in November 2018, which is 2.50 inches above normal.
