The Industrial Parkway Widening project will address increasing travel demand in southern Union County by expanding the existing 4.3 mile, two lane major collector roadway to a five lane thoroughfare from SR 161 to US 42. The project includes the installation of a multi-use path to provide for the safe connectivity of cyclists and pedestrians while also providing accessibility for the residents and businesses.

**Project Benefits**

- Provides expanded capacity, improved safety and access management for approximately 1,000 acres of existing development
- Prepares approximately 1,300 acres of undeveloped land directly adjacent to the US 33 corridor with adequate transportation infrastructure
- Provides connectivity for cyclists and pedestrians by expanding and extending a multi-use path along the corridor
- Presence of existing fiber optic infrastructure combined with increased capacity fill further facilitate the research and implementation of autonomous and connected vehicles (AV/CV), as well as support business expansion
