Air Quality Summary | June 2018

Mid-Ohio Regional
Planning Commission

Central Ohio

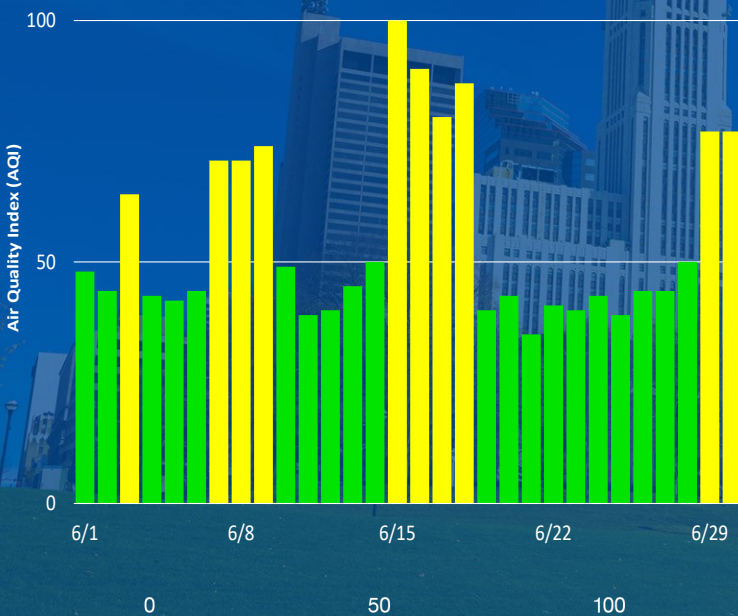

The Mid-Ohio Regional Planning Commission provides daily air quality forecasts and issues Air Quality Alerts to help you plan ahead and protect your health. For free Air Quality Alerts and more information please visit:

www.morpc.org/airquality

Air quality conditions in June 2018 were significantly better than those reported in June 2016 and 2017. According to AirNow data dating back to 2009, June 2018 was the cleanest June on record. Although temperatures were slightly above average, humid air masses—brought by showers, thunderstorms, and southerly winds—enhanced atmospheric mixing and pollutant dispersion, reduced ozone formation, and led to clean air quality on many days.

Daily Maximum AQI For June 2018

In June 2018, AQI levels in the Columbus region were Good on 20 days and Moderate on 10 days. Air Quality Alerts were issued on June 16, 17, and 18, and high-Moderate AQI levels were reported on all three days.

Average Temperature

The average temperature in Columbus in June 2018 was 73.9°F, which is 2.4°F above normal.

Average

Columbus received 6.71 inches of precipitation in June 2018, which is 2.70 inches above normal.
