

FRANKLIN COUNTY

TRANSPORTATION IMPROVEMENT DISTRICT

ABOUT THE FCTID

Established in March 2019, the FCTID's primary function is to facilitate collaboration between local jurisdictional partners and other county, state and federal agencies to identify, develop and secure funding for transportation improvement projects that support local and regional economic development strategies in Franklin County. The FCTID actively seeks out and builds partnerships that harness private sector innovation and resources, encourages competition, and optimizes the assignment of risk. Through this approach, the FCTID brings about cost-effective and environmentally compatible solutions for project development and delivery.

FCTID Mailing List

If you would like to receive FCTID Board of Trustees meeting invitations, meeting materials, and newsletters, please email tgraham@morpc.org to be included on the FCTID mailing list.

FCTID RECEIVES ODOT JOBS & COMMERCE GRANT

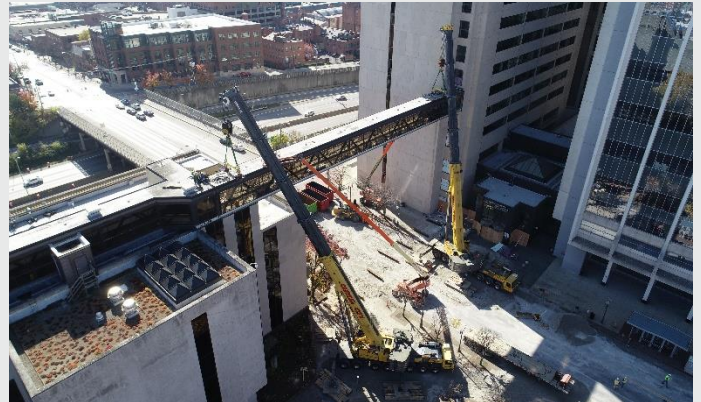

The Franklin County Transportation Improvement District has been awarded a \$250,000 grant for construction of the University Boulevard Project in the City of Dublin. This successful grant application is the result of collaboration between the FCTID, the Franklin County Engineer's Office, the City of Dublin, and The Ohio State University. The University Boulevard Project will construct a new roadway between Eiterman Road and Avery Road, and it will also improve the intersection of Shier Rings Road and Avery Road. This project will support the development of a new comprehensive ambulatory medical facility, which will create 350 new jobs in the region.

PEDESTRIAN BRIDGE OVER HIGH STREET DEMOLISHED

The FCTID, on behalf of the Franklin County Board of Commissioners, demolished the pedestrian bridge previously located over South High Street, between Fulton Street and Mound Street on Saturday, November 7, 2020.

Demolition of the pedestrian bridge was the first phase of the FCTID's Franklin County Parking Facilities Improvement Project, which aims to maintain and improve access to parking facilities associated with Franklin County's Downtown Complex (34 East Fulton Street, 373 South High Street, and 399 South Front Street). The total project cost was \$923,958, and the bridge demolition work was completed by Corna Kokosing.

The Franklin County Parking Facilities Improvement Project is one of the first projects implemented by the FCTID since the board was created in the spring of 2019. Future phases of this project will aim to minimize construction impacts to Franklin County parking facilities related to the ongoing Columbus Crossroads project.

ALEX BERES LEAVES FCTID TO ACCEPT POSITION WITH USDOT

Alex Beres resigned as Secretary-Treasurer of the FCTID on Sept. 25, 2020 to accept a position as a Senior Policy Analyst with the USDOT's Office of Infrastructure Finance and Innovation in Washington D.C. Alex was integral in the successful creation of the FCTID, and he had served on the board since the FCTID's inception. We thank him for his dedicated service to the TID and wish him the best of luck in his new position.
