---

Aaron and Doug,

I have an email out to Kelsey Finch with the Future of Privacy Forum / Civil Data Privacy Leaders Network CDPLN, as she is spearheading an effort there to pull together an open resource library for CDPLN members to contribute to nationwide. I have asked about their timeline and whether they have defined their “buckets” to date.

In addition, I have gone through and indexed the resources we have in SharePoint in the attached .xls pivot table, coding them by sample metadata to give us a sense of where we have ample (or lacking) domain/sub-domain coverage. I used the same domain framing as the survey to start. I’m also attaching pdfs of the resources by domain sheet and metadata sheet for discussion purposes. I hope these views prove useful as we seek out additional resources.

Unfortunately, health issues kept me offline for half of last week. I wasn’t able to get through the survey question development. That said, I’m happy to work both of those questions up by the next meeting.

Tomorrow I will be calling in, but I look forward to seeing you in person on Wednesday.

All the best,

Best regards,  
Christina

---

Colleagues,

I had an action item to mock-up possible sourcing survey questions. Please see attached.

The sourcing domain includes considerations for building, buying, sharing, leasing, renting, licensing and subscribing and includes policy topics such as shared services, cloud services and data stewardship in third-party relationships. This domain in particular is key to several MORPC objectives.

I have also uploaded this and the personnel questions mock-up to the working group SharePoint site.

-Christian
