

STUDY OVERVIEW

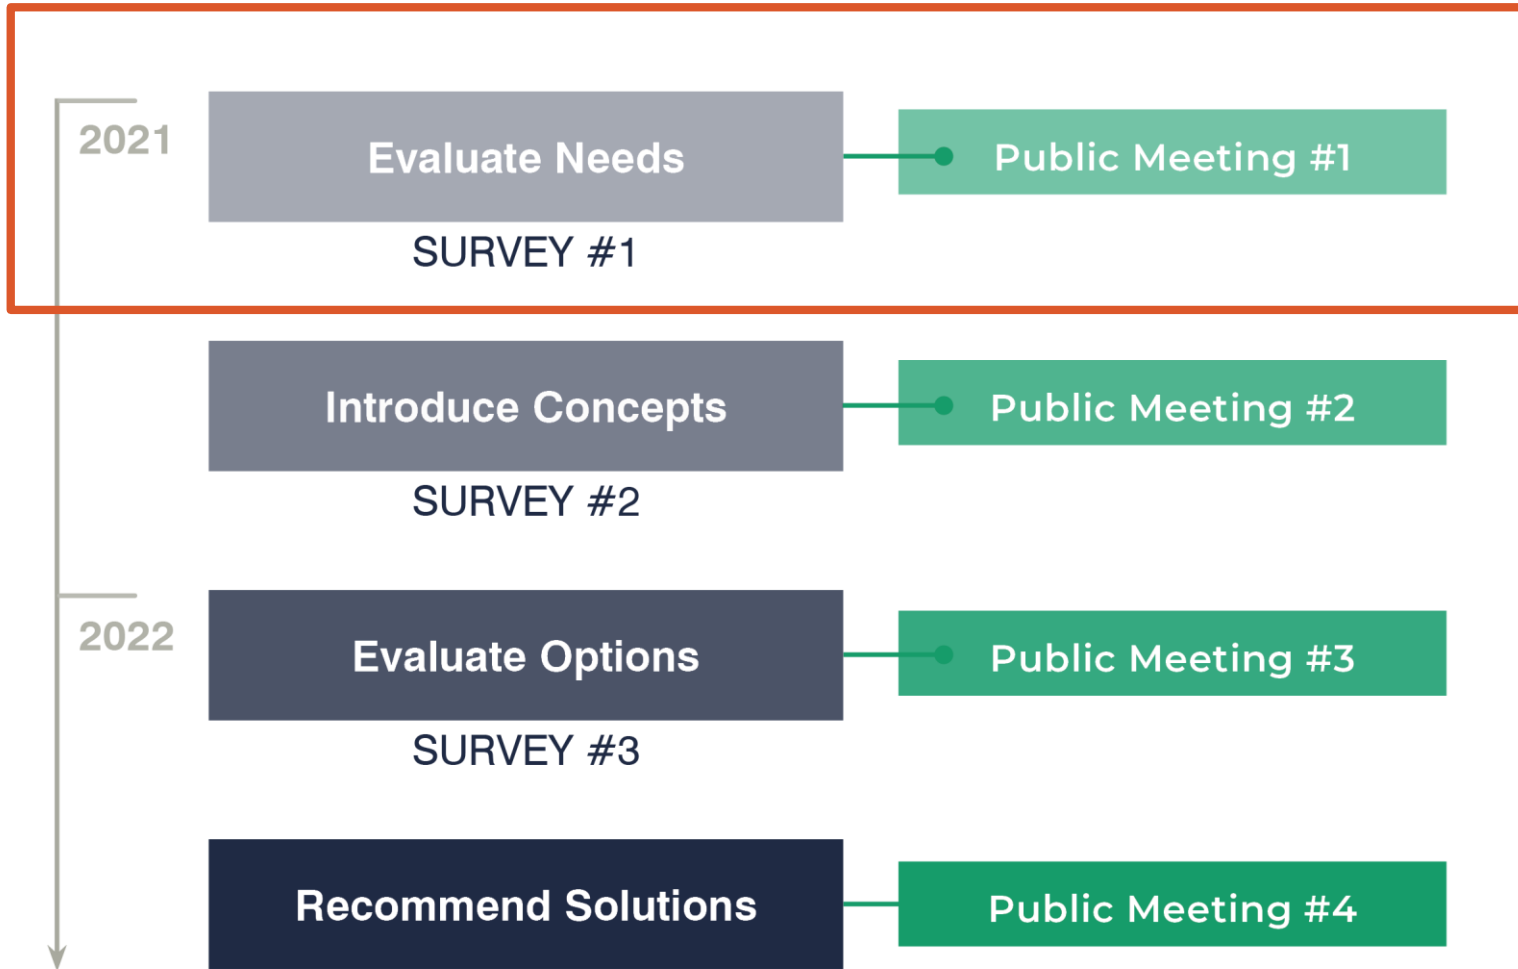

WHAT

- Determine the feasibility of a free-flowing connection between the Columbus and Toledo Regions.
- Evaluate different options for improvements through Delaware County between Waldo in Marion County and I-270 in Franklin County.
 - Upgrade current U.S. 23
 - West of U.S. 23 (via U.S. 33)
 - East of U.S. 23 (via I-71)

PARTNERS

ENGAGEMENT PROCESS

- Each round will include:
- Technical Advisory Committee
 - Steering Committee Meeting
 - Stakeholder Meetings
 - Public Meetings
 - Online Survey
 - Overview Video

PROJECT FUNDING

Project Information			
Application ID	2021-D06-05	Date Submitted	3/26/2021
Project Name	US 23 Corridor Study		
ODOT District	District 6	County	Delaware
ODOT PID	112768	Project Mode	Roadway
What is the current TRAC Tier	New Project		
What is the requested TRAC Tier	Tier II - Development		
Please identify the project mode (roadway, transit or freight):	Roadway		
Project Description:			
This project will identify the most feasible way of improving the link between Toledo and Columbus. The study will focus on physical improvements between Waldo (end of existing freeway) and I-270. The primary concepts under study include a west bypass of Delaware connecting to US 33, and upgrade of the existing alignment on US 23, and an eastern bypass connecting to I-71.			

- TRAC application submitted in March
- TRAC presentation on May 26th
- \$1.5M in preliminary engineering requested for this TRAC cycle
