The Central Alum Creek Water Reclamation Facility project will construct a new sanitary sewer plant to provide sewer service to portions of Berlin and Berkshire Townships surrounding Alum Creek. This energy efficient wastewater treatment facility is critically necessary to meet the demands of a growing community. The plant will use best available technology and employ a diverse workforce to operate the plant and keep up with wastewater sector technology.

DELAWARE COUNTY

Lead Agency:

Delaware County Regional Sewer District

Partner Agencies:

Delaware County Commissioners, Delaware County Engineer's Office

Estimated Cost:

\$65 million

Program Pillar:

Sustainable and Efficient Economic Growth;
Infrastructure Planning and Implementation

Project Contact:

Tiffany Maag, Director/Sanitary Engineer, Delaware County Regional Sewer District
tmaag@co.delaware.oh.us

TIER I PROJECT

Project Benefits:

- Improves water quality of Alum Creek by improving the quality of effluent discharge.
- Protects natural resources by reducing the number of on-site treatment and septic tanks in the area.
- Incorporates water reuse opportunities to make the utility more efficient and sustainable long-term.
- Provides sewer service in an area where such a service is not currently available.

Project Location

US 36/SR 37 north of Alum Creek Lake
